Erratum: In Eq. (6), the X_{12} in the final term should instead be X_{12}^* . Thus, the correct form of Eq. (6) is

$$T_1 = \frac{1}{\left(1 - |\Gamma_{GS}|^2\right)} \left\{ \frac{|S_{12}|^2 (1 - |\Gamma_G|^2)}{|1 - \Gamma_G S_{22}|^2} T_G + \frac{|S_{12} S_{21} \Gamma_G|^2}{|1 - \Gamma_G S_{22}|^2} X_2 + X_1 + 2 \operatorname{Re} \left[\frac{S_{12} S_{21} \Gamma_G X_{12}^*}{1 - \Gamma_G S_{22}} \right] \right\}$$

Results in the paper are unchanged. I am grateful to Tom McKay of RF Micro Devices and Larry Wagner of IBM for calling this to my attention.
